This Mid-Autumn Festival, the White Jade Rabbit has transformed into a futuristic scientist called Dr.J Rabbit. He founded his own Celestial Lab to experiment on the magical ingredients from his roots—The Moon and come out with 2 hypothesis: What is the taste of the Moon? What is the color of the Moon?

He discovered 4 extraordinary powers — Prosperity, Eternity, Virtuosity, and Vitality. He believes that these powers can make The Moon a better place for reunion.

Now, Dr.J Rabbit invites you to his Celestial Lab to assist him in improving his formula. Get your lab coat out and start experimenting today!
